

the origin of santa:

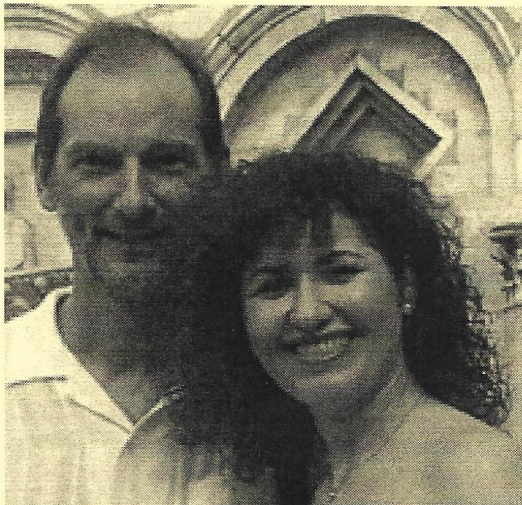

evolution...?

or intelligent design?

2005 and still asking the wrong questions...

merry christmas

happy holidays

peace, hope and compassion?

we can only wish.

**Notes:**

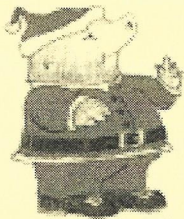

1. Intelligent Design, the Trojan horse of Creationism knocking at the door of Science. Enough said.
2. Middle panel, small print conversation for aging eyes like ours: "Oops." "Maybe not so intelligent..."  
The leg assembly on Frankensanta, get it?
3. Pisa, leaning towers and fairy tale Italian weddings. Another memorable marriage event, July 2005.
4. Divieto di sosta e di fermata = No Parking or Stopping Even at Night
